

Suzan Mansuri

Frontend Developer | Gandhinagar, Gujarat

suzanmansuri.work@gmail.com | [LinkedIn](#) | [GitHub](#) | [lilblackboot.dev](#)

PROFESSIONAL SUMMARY

Frontend Developer with a strong focus on production resilience and the "last mile" of the user experience. Expertise in the modern ReactJS stack, modern JavaScript (ES6+), and frontend optimization to deliver flawless, high-performance web applications. Proven ability to bridge the gap between design and engineering. Highly adaptable and communicative, with a strong track record of successful freelance projects collaborating across various international time zones, ensuring I am fully prepared to maintain the mandatory US overlap schedule and thrive in a remote, high-velocity environment.

TECHNICAL SKILLS

Core Stack: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3

Frontend & Optimization: React Hooks, Context API, React Router, State Management, React Profiler, browser DevTools, Frontend Optimization

API & Tooling: REST APIs, GraphQL (Familiarity), Vite, Webpack, Git, GitHub

Design & Architecture: Figma, Component-Driven Architecture, UI/UX Design, Tailwind CSS

WORK EXPERIENCE

Software Developer - Intern

October 2025 – Present

Nishant Technologies

- Engineered scalable frontend architectures using Next.js and React Native, focusing on component-driven development and state management reliability.
- Partnered with cross-functional design and product teams to translate Figma concepts into pixel-perfect, highly responsive user interfaces, acting as a bridge builder between technical constraints and user needs.
- Debugged complex integration edge cases and API data fetching challenges during the implementation of Generative AI models into client web applications.

Web Developer

Jan 2026 – Present

Lumea Marketing Agency

- Led performance engineering initiatives by implementing technical SEO strategies and frontend optimizations, significantly reducing load times and improving rendering efficiency across platforms.
- Managed web infrastructure for high reliability, ensuring smooth execution, fast load times, and responsive design across mobile and desktop devices.
- Designed high-quality digital assets and maintained visual brand consistency using Figma, demonstrating user-centric ownership over the final shipped product.

Freelance Software Developer

2024 – Present

Independent Projects (checkout my website to know more about them)

- Executed high-quality software development projects for international clients, successfully managing communications and deliverables across diverse global time zones.
- Adapted to asynchronous workflows and maintained overlapping hours with overseas stakeholders to ensure seamless real-time collaboration and rapid issue resolution.

PROJECTS

goGuide - Campus Navigation System

React, React Native, TypeScript

- Developed a responsive campus navigation and student guide platform for Parul University, featuring a user-friendly frontend architecture for both mobile and web applications.

Nutriwise - AI-Powered Food Scanner

React Native, Expo, Firebase, REST APIs

- Built a mobile application that leverages image recognition and REST APIs to provide real-time nutritional scan and analysis, and food tracking for health-conscious users.

EDUCATION

Parul University

B.Tech in Computer Science & Engineering (Specialization in AI)

Vadodara, Gujarat

Graduating 2026

Oxford English School

Higher Secondary Education (12th Grade)

Patan, Gujarat
